EDUCATION

City University of Hong Kong

BSc Computer Science | Minor in Mathematics

- CGPA: 3.84/4.30
- Relevant Coursework: Linear Algebra, Calculus, Computational Probability Modeling, Business Statistics

Hong Kong
Expected 2029

RESEARCH INTERESTS

Core:	Machine Learning, Deep Learning, Data Science, Applied AI
Lusheng Wang:	Machine Learning, Deep Learning, AI for Science, Interdisciplinary AI
Antoni Chan:	Machine Learning, Deep Learning, Computer Vision, Applied AI
Heqing Huang:	Machine Learning, Deep Learning, Large Language Models, AI for Software Engineering

SELECTED PROJECTS

Titanic Survival Prediction Python, Pandas, scikit-learn, XGBoost	GitHub
Built an end-to-end classification workflow covering EDA, missing-value treatment, feature engineering, cross-validation, and tuned Random Forest/XGBoost models, achieving approximately 78% public leaderboard accuracy.	
House Price Prediction Python, Pandas, scikit-learn, XGBoost	GitHub
Built an end-to-end regression workflow with data inspection, feature engineering, categorical encoding, cross-validation, and hyperparameter tuning across Linear Regression, Random Forest, and XGBoost.	
BridgeCare - AI Agent TypeScript, LLM APIs, Vercel	GitHub
Led a team developing an AI-agent solution to streamline welfare applications for vulnerable groups; contributed to web development, LLM integration, testing, and deployment.	
VeriHK TypeScript	GitHub
Developed and maintained a TypeScript web application for the Hong Kong ICT Awards 2026 Student Innovation Award, spanning implementation, API configuration, version control, and deployment.	

TECHNICAL SKILLS

Programming:	Python, C++, JavaScript/TypeScript
Machine Learning & Data:	Pandas, NumPy, scikit-learn, XGBoost, Matplotlib
AI & Development:	LLM APIs, Supabase, Vercel
Tools:	Git, Jupyter Notebook, VS Code, Linux
Algorithms:	Data Structures & Algorithms, LeetCode (90+ problems)

HONORS & AWARDS

- Dean's List (Semester A & B, 2025/26), City University of Hong Kong
- Full Scholarship Recipient, City University of Hong Kong
- Top 8 Finalist, GDGoC Hackathon 2026 - Build with Agentic AI
